Terms of Service — Personal Upload Scheduler

Last updated: 14 August 2026

1. What this document covers

Personal Upload Scheduler ("the tool") is a private command-line application written and used by one individual ("the operator") to publish the operator's own videos to the operator's own YouTube channels.

The tool is not offered to the public. It is not distributed, sold, licensed, sublicensed or made available to any third party. There is no download, no sign-up, no hosted interface and no public endpoint. There are no users other than the operator.

These terms therefore describe the operator's own use of the tool.

2. Use of YouTube API Services

The tool uses **YouTube API Services**.

By using the tool, the operator agrees to be bound by the [YouTube Terms of Service](#).

The operator also agrees to the [Google Privacy Policy](#), which describes how Google handles data.

3. Permitted use

The tool may be used only to:

- upload video files that the operator created and owns;
- set the title, description, tags, category, thumbnail and scheduled publish time of those videos;
- read back those same videos to confirm an upload succeeded;
- add those videos to playlists on the operator's own channels.

The tool must not be used to access, collect, store or process data belonging to any other YouTube user or channel.

4. Prohibited use

The tool must not be used to:

- scrape, cache, aggregate or republish other people's YouTube content or metadata;
- circumvent, disable or interfere with any part of YouTube API Services;
- upload content the operator does not have the rights to publish;
- misrepresent the nature of uploaded content, including the "made for kids" and "altered or synthetic content" declarations.

5. Content declarations

Every upload sets the "made for kids" and "altered or synthetic content" flags according to the actual nature of the video. Videos containing AI-generated voice or imagery are declared as synthetic media and state this in the video description.

6. Third-party assets

Where a video uses third-party assets, they are used under a licence that permits the use, or are in the public domain. Attribution required by a licence is shown in the video description.

7. No warranty

The tool is provided as-is for the operator's own use. No warranty of any kind is given or implied, because it is not supplied to anyone.

8. Termination

The operator may stop using the tool at any time and may revoke its access to the operator's Google Account at <https://myaccount.google.com/permissions>.

9. Changes

Any change to these terms will be published on this page with an updated date.
